

## Membership in Texas Green Network

Since 2008, Texas Green Network has been building a key connecting point for emerging green and socially conscious business communities in Texas. Bringing together small business leaders, non-profit groups, environmental advocates and policy makers, TGN has established itself as a community builder and the first “green” business chamber of commerce in Texas.

Today we bring together businesses and professionals to create a unified voice on important environmental issues. Unified, the environmentally conscious small business community is a potential powerhouse, largely untapped to date.

Membership in Texas Green Network is about leadership in the business community and being a part of an emerging business culture in America. It is about making a statement that sustainability is a must, essential to the future of our planet, our communities and our economies.

As a Member of Texas Green Network, you have the opportunity to enjoy the benefits of membership (detailed in this kit) to plug in, network and promote your efforts and your business.

You will also have the opportunity to speak out, anonymously or by name, on the environmental issues that are important to you. Through your questionnaire responses, you can voice your positions. Then you will have opportunities for deeper participation through our events, committees, newsletters and the relationships and alliances you develop through the network.

We look forward to meeting you and your business or organization and to welcoming you as a visible and vocal part of this crucial and growing business community. Join us now and be heard.

### **Benefits of Membership**
